

Self Adhesive Security Seals

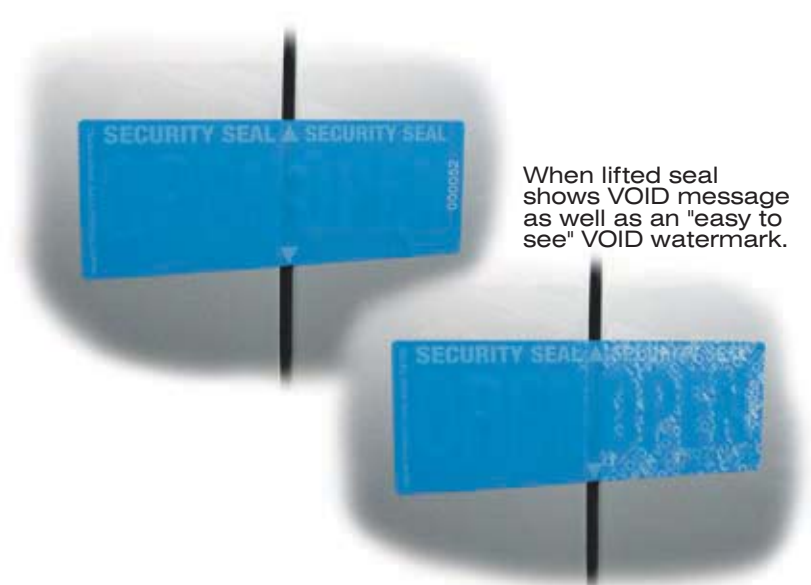

KND - Non-residue "large" VOID Seal

This enhanced performance tamper evident material shows a clear VOID/OPEN security message when the seal is lifted. Initially as a "high viz" seal for aviation hatches on aircraft parked overnight. However it is now used in general sealing offering the same "high viz" qualities

- Supplied in reels with backing liner perforated between each seal for easy use.
- Customised face design and 'watermark' identity in security message together with sequential numbering as standard.
- Supplied in red or blue but other colours are available for larger quantity orders.

Position seal centrally over

When lifted seal shows VOID message as well as an "easy to see" VOID watermark.
