

*Type C
ultra destruct label*

This label is made from a thin gauge white vinyl and fragments if any attempt is made to remove or transfer it. Printed with the customer's design and available in a full range of colours, it is extremely flexible and can be used for a multitude of purposes such as bar code identification. When applied to a clean surface, free from grease or silicon, maximum adhesion will develop after 24 hours. The label can be used inside or outside and there is a sequential numbering overprint option.

Type LAB laser etched highly durable, identification label

This highly flexible self-adhesive label, made of thin gauge multi-layered acrylic, is fully tamper evident and cannot be removed or transferred without being destroyed. The design or information is laser etched into the label, giving a high contrast inscription, which is scratch, abrasion and impact resistant also impervious to many aggressive chemicals and solvents. It is suitable for internal or external use and can withstand extremes of temperature or weather conditions. Labels can be engraved with the customer's logo, graphics and text and can include sequential numbering or variable bar codes.

Type C and Type LAB
